

# Diversified Selects Analog Way's Picturall Pro Media Server to Drive Lobby Video Exhibit at W.L. Gore's Capabilities Center

***The Philadelphia branch of global systems integrator Diversified completed the design and integration of "The Powers of Ten" video exhibit in the lobby of the W.L. Gore Capabilities Center using Analog Way's Picturall Pro media server to feed the content.***

W.L. Gore is an award-winning developer and manufacturer of high-performance fluorocarbon polymers. The company has reinvented the tour experience for partners, customers and visitors at its Capabilities Center in Newark, Delaware where exhibits showcase Gore's corporate community, culture, technology and products.

Diversified provided the design, development, testing, fabrication and deployment of the latest in immersive exhibit technology for the Center. Bluecadet, an experience strategy and design agency, was responsible for redesigning Gore's spatial experience and generating the custom ultra HD content.

The lobby installation showcases original videos, inspired by Charles and Ray Eames's short documentaries called "The Powers of Ten," which hint at Gore's global reach. It consists of 13 Planar Mosaic displays, both 22-inch diagonal square and standard 55-inch diagonal models in horizontal and vertical orientations, arrayed on a wall in a lattice form with spaces between the screens. Advanced Mounting Design, Inc. created the displays' custom mount.

"The different sizes and orientations of the displays that span the wall posed a challenge as did the big media canvas that required play back," says Seth Teates, Analog Way's Regional Sales Manager. "Diversified needed a rock solid, reliable media server that could play back an 8K x 6.5K pixel canvas, including the dead spaces. A single Picturall Pro, designed and built for 24/7 mission critical use, was powerful enough for the job."

"We were looking for a solution that could treat the exhibit as a single video canvas with content mapped seamlessly onto 13 screens at very high resolution," explains Diversified Director Perry Freifeld. "We looked at a few solutions, and Picturall Pro had the right capabilities and price point. The Analog Way team worked with us and Bluecadet to configure a solution whose reliability and high performance met all the requirements of the project and delivered a great-looking videowall."

Teates notes that Picturall Pro's Picturall Commander control software permitted easy positioning of the content on the uniquely designed exhibit. "Our control GUI enabled precise and pixel-perfect content positioning to match the physical build out of the wall," he says.

Diversified has a managed services agreement with Gore for the exhibit. "Gore's Capabilities team manages the space and the display," Freifeld says. "But the set-it-and-forget it nature of Picturall Pro keeps the exhibit running flawlessly every day of the week."

Aaron Hickman was Diversified's Design Engineer for the project.

## About Analog Way

Analog Way is a world-leading designer and manufacturer of innovative equipment dedicated to the professional audiovisual industry. The company's portfolio includes a wide range of award-winning multi-screen presentation systems, media servers, event controllers and multi-format converters, designed to deliver uncompromising video presentation experiences to high-end staging and premium system integration. For 30 years, Analog Way has provided advanced processing technologies, which accommodate a large range of applications, from massive video wall installations to large corporate events worldwide.
