

Take control of any Midra™ series switcher with multiple interfaces simultaneously

Up to five interfaces connected to the same Midra™ series switcher

Once installed on your computer, **AW Gateway** serves as a seamless bridge between any **Midra™** series switcher and up to five interfaces (**RCS2**, **RK-350**, ...) running in parallel.

AW Gateway at a glance

- ▶ Connect simultaneously up to 5 interfaces to the same **Midra™** series switcher
- ▶ Compatible with **RCS2** and **RK-350** as well as with any third party application that uses the TPP protocol or the AMX/Crestron drivers
- ▶ Available for Windows and Mac OS
- ▶ Compatible with TCP protocol only (UDP and RS232 not supported)

Free tools also available on www.analogway.com

- ▶ **AW Simulator**: Simulate Analog Way multi-format converter **VIO 4K** and **LiveCore™** image processors on your PC or Mac
- ▶ **AW EDID Editor**: Solution to create and edit EDID files for an optimal compatibility between your sources and displays
- ▶ **AW Screen Frame Cutter**: Tool to split any wide-screen image into multiple still backgrounds for your multi-projector Soft Edge Blending or for your Custom Canvas screen setup

AW Gateway is available on www.analogway.com
