Technical Notes

Version 4.20

- Correction: [OPS300] Payload ID management for SDI outputs.

- Correction: Problem of frame capture size when switching capture source from RCS.

- Correction: Automatic exit of menu "Motion correction" doesn't work when switching to a non-interlaced input.

- Correction: The logo chroma-key grabber position doesn't change on output 2.

- Correction: When changing the HV size of a PIP, the H size suddenly goes to 0.

- Correction: Strobbing effect for sources whose rate is really close to the output rate

- Correction: [OPS300] Embed the payload ID of HDTV format in the SDI data output streams

- Correction: The tolerance setting of logo capture keying doesn't work

- Correction: When switching the logo capture source from RCS, the grabber doesn't disappear from the previous capture source

MM:	**K = FF0C**
